UNITECH

Unitech

Founded in 1998, Zhuhai Unitech Power Technology Co., Ltd. is dedicated to providing global-leading operation safety process interlocks and intelligent products for industrial enterprises. The company has successively won the honors such as "National Champion Demonstration Enterprise in Manufacturing Industry", "National Intellectual Property Demonstration Enterprise", and "China Excellent Patent Award". We have obtained more than 1,027 authorized patents and many of our achievements and products are recognized as "world-leading". At present, the company's products have been widely used in electric power, rail transit, petrochemical, metallurgy, coal and other industries.

60000+

Unitech products are applied to more than 60000 engineering projects worldwide in such industries as power, petrochemical, metallurgy, coal, and rail transportation.

30+

Since the microcomputer controlled interlocking system was invented, Unitech has had more than 30 years of industry experience.

4

It has four product series: safety management, intelligent monitoring, intelligent auxiliary control and intelligent lock control.

Company Profile

02/

Male Type-C Passive Lock Cylinder

03/

Female Type-C Passive Lock
Cylinder and Key

04/

Bluetooth Lock Body

Product Characteristics

Unitech smart cloud lock system has solved the following problems:

- Standard size design, installed in the same way as that of mechanical locks, no power supply or wires required
- All locks can be opened with one key after authorization
- Your phone becomes the key to directly unlock the passive lock
- Remote authorization and cancellation anytime and anywhere
- Operation record storage
- SM4 / AES encryption algorithm, providing high security guarantee

Product Category

Unitech smart cloud lock include Type-C passive electronic lock and Bluetooth lock; we can design various locks, mainly including following categories:

01

TYPE-C Male Passive Lock

- Passive lock cylinder; the type-c interface of the mobile phone is directly plugged in for reverse power supply and unlocking, completely eliminating the need for keys

02 TYPE-C Female Passive Lock

- Passive lock cylinder; power supply and unlocking by electronic key; the mobile APP can be configured with the permission to unlock with an electronic key

03 TYPE-C Female Self-Driven Lock

- Passive lock cylinder; power supply and unlocking by a mobile phone + type-c cable, no electronic key required

04 Bluetooth Lock Body

- Passive lock cylinder; power supply and unlocking by a mobile phone + type-c cable, no electronic key required

Application Scenarios

Type-c passive locks are widely used in industries the power, municipal affairs, communications, office parks, shopping malls, banks, schools, hazardous chemicals, households and other industries

Power box/ cabinet

Data server room

Bank outlets

Office parks

Shopping malls

Schools

Hazardous chemical management

Household

Male Type-C Lock Cylinder

Various locks can be embedded to achieve the mobile phone direct-insert unlocking, such as smart door locks, padlocks, cabinet locks, etc.

Applications: Emergency unlocking, low-frequency unlocking

Lock Name	Male Type-C Lock Cylinder
Material and surface treatment	H59 copper
Size	Ø15*34.9mm
Protection level	IP44
Working temperature	-25~55°C
Operating humidity	≤95%RH
Mechanical life	>10000 times
Unlocking method	Phone direct-insert power supply and unlocking
Applicable locks	Padlocks, cabinet locks, handle locks, box / cabinet locks, etc.

No power supply or wiring required, simple installation, convenient maintenance

no electronic keys or USB cables required; just insert your mobile phone into it for unlocking

you can use APP for remote permission management and check unlocking records at anytime and anywhere

Passive

Customizable lock head length

Maintenance free

Your phone becomes the key

Installation Dimensions (mm)

Product Dimensions (mm)

Lock Name	Male Type-C plug-core lock
Material and surface treatment	Copper alloy\ Matte chrome plated
Size	26.5x25x107.68m
Thickness of applicable door	40-120mm
Protection level	IP44
Working temperature	-25~55°C
Operating humidity	≤95%RH
Mechanical life	>10000 times
Unlocking method	Phone direct-insert power supply and unlocking
Applications	Replacing door lock plug-core lock

Mechanical door locks

Intelligent door lock

No power supply or wiring required, simple installation, convenient maintenance

no electronic keys or USB cables required; just insert your mobile phone into it for unlocking

you can use APP for remote permission management and check unlocking records at anytime and anywhere

Passive

Optional Bluetooth unlocking

Maintenance free

Your phone becomes the key

Installation Dimensions (mm)

Product Dimensions (mm)

Lock Name	Male Type-C cabinet lock
Material and surface treatment	Zinc alloy\ nanometer spraying
Size	80x30x53mm
Protection level	IP44
Working temperature	-25~55°C
Operating humidity	≤95%RH
Mechanical life	>10,000 times
Unlocking method	Phone direct-insert power supply and unlocking
Applications	Storage cabinets, drawers, filing cabinets, etc.

Storage cabinet

Storage cabinet

Filing cabinet

No power supply or wiring required, simple installation, convenient maintenance

no electronic keys or USB cables required; just insert your mobile phone into it for unlocking

you can use APP for remote permission management and check unlocking records at anytime and anywhere

Passive

Customizable lock case appearance and dimensions

Maintenance free

Your phone becomes the key

Installation Dimensions (mm)

Product Dimensions (mm)

Lock Name	Male Type-C padlock
Material and surface treatment	Zinc alloy\ varnishing
Size	43x22x83mm
Beam locking diameter	φ6mm
Protection level	IP54
Working temperature	-25~55℃
Operating humidity	≤95%RH
Mechanical life	>10,000 times
Unlocking method	Phone direct-insert power supply and unlocking
Applications	Outdoor cabinets, logistics boxes, storage doors/ cabinets, doors and windows, etc.

Outdoor cabinet

Logistics box

Warehousing

No power supply or wiring required, simple installation, convenient maintenance

no electronic keys or USB cables required; just insert your mobile phone into it for unlocking

you can use APP for remote permission management and check unlocking records at anytime and anywhere

Passive

Optional connecting rod

Maintenance free

Your phone becomes the key

Installation Dimensions (mm)

Product Dimensions (mm)

Lock Name	Male Type-C cabinet lock
Material and surface treatment	Zinc alloy\ nanometer spraying
Size	165x90.5x58.6mm
Door thickness	<7mm
Protection level	IP54
Working temperature	-25~55°C
Operating humidity	≤95%RH
Mechanical life	>10,000 times
Unlocking method	Phone direct-insert power supply and unlocking
Applications	Power cabinets, data cabinets, communication cabinets, charging piles, etc.

Power box/ cabinet

Data cabinet

Communication cabinet

No power supply or wiring required, simple installation, convenient maintenance

no electronic keys or USB cables required; just insert your mobile phone into it for unlocking

you can use APP for remote permission management and check unlocking records at anytime and anywhere

Lock Name	Intelligent door lock emergency lock head
Material and surface treatment	MIM304
Size	Standard European standard plug-core lock head size
Door thickness	40~110mm
Protection level	IP44
Working temperature	-25~55°C
Operating humidity	≤95%RH
Mechanical life	>10,000 times
Unlocking method	Phone direct-insert power suppl\ Temporary panel power supply
Applications	Intelligent door lock

Intelligent door lock

Type-C Intelligent Locks and Keys

Unitech Type-C smart locks and keys, with a variety of lock styles, including European standard locks, padlocks, cabinet locks, box locks, cam locks, etc. The key is equipped with Bluetooth communication and can be expanded with fingerprint recognition function. It supports online unlocking through the APP and offline unlocking by the unlocking device.

System Composition

Type-C key: It realizes the locking and unlocking operations of locks within the scope of authorization, and has the functions such as powering and communicating with the lock, identifying the identity of the lock, authorization operations, and Bluetooth connection with the APP

Type-C smart lock: A smart lock is formed by embedding Type-C passive electronic lock cylinders into various mechanical lock cases and supports Type-C key unlocking

Application mode: There are a large number of locks that need to be managed. After authorization, all locks can be unlocked by one key, and they are managed by zones and levels

Type-C idle/ non-idle passive electronic lock cylinder
The key powers the lock cylinder and unlocks it.
In standard sizes, it can be integrated into various locks

Passive

Standard Type-C interface

Maintenance free

Switch lock status

Product Dimensions (mm)

Lock Name	Type-C idle/non-idle lock cylinder
Material and surface treatment	H59 copper
Size	Ø17x27mm
Protection level	IP55
Working temperature	-25~55°C
Operating humidity	≤95%RH
Mechanical life	>10,000 times
Unlocking method	Key power supply and unlocking
Applicable locks	Padlocks, cabinet locks, handle locks, box / cabinet locks, etc.

Padlock

Cabinet lock

Handle lock

Fingerprint electronic key, with built-in rechargeable batteries, supports Bluetooth communication

Supports online unlocking via APP and offline unlocking via key, and stores unlocking records in real time

Fingerprint recognition of personnel identity, screen interaction operation process

Rechargeable battery

Bluetooth communication

Color display screen

Fingerprint recognition of personnel identity

Product Dimensions (mm)

Lock Name	Fingerprint electronic key
Material and surface treatment	Stainless steel middle frame/ ABS+PC shell
Size	76.9x39x19mm
Power supply method	Rechargeable lithium battery
Battery life	Number of unlocking operations ≥ 400 (25°C) or standby for 3 months
Protection level	IP54
Working temperature	-25~55°C
Operating humidity	$\leq 95\%RH$
Mechanical life	>10,000 times
Unlocking method	Online unlocking via mobile phone APP/ Offline unlocking with key
Applicable locks	Female Type-C idle/ non-idle lock

Authorization Mode

Equipped with the built-in rechargeable battery, supporting Bluetooth communication

Supports online unlocking via APP and offline unlocking via key, and stores unlocking records in real time

The indicator displays the operation process

Rechargeable battery

Bluetooth communication

Indicator communication

Product Dimensions (mm)

Lock Name	Simple electronic key
Material and surface treatment	ABS shell
Size	55.9x33.6x15.5mm
Power supply method	Rechargeable lithium battery
Battery life	Number of continuous unlocking operations ≥ 300 (25°C) or standby for 3 months
Protection level	IP52
Working temperature	-25~55°C
Operating humidity	$\leq 95\%RH$
Mechanical life	>10,000 times
Unlocking method	Online unlocking via mobile phone APP/ Offline unlocking with key
Applicable locks	Female Type-C idle/ non-idle lock

Authorization Mode

No power supply or wiring required, simple installation, convenient maintenance;

Insert the key into the lock for power supply and unlocking. After authorization, one key can unlock all locks

APP management of key permissions and operation records

Passive

Idle/ non-idle lock cylinder

Maintenance free

Power supply and unlocking by electronic key
